

Ly thuyet trong tam

- Muc tieu va lo trinh Day 02. Day 02 tap trung vao viec bien yeu cau mo ho thanh Problem Statement ro rang e ra quyet inh. Buoì sang hoc khung ly thuyet ve Problem Discovery (Double Diamond, HCD), Problem Statement va inh luong hoa, cung cac buoc PAIR. Buoì chieu thuc hanh lab: tim 5 bai toan, ien Problem Cards, phan bien cheo, chot bai toan, xac thuc du lieu, ve quy trinh, xac inh giai phap va ra quyet inh. Cuoi buoi nop Problem Statement hoan chinh (nhom) va nhat ky phan tu (ca nhan). [trang 2]

- Mo hình Double Diamond. Double Diamond là mô hình do Don Norman / British Design Council (2005) e xuất, gom hai giai oan: Diamond 1 - Tim ung van e (Discover: mô rong khao sat van e can ban; Define: thu hep xac inh ung bai toan goc) va Diamond 2 - Tim ung giai phap (Develop: mô rong nhieu giai phap tiem nang; Deliver: thu hep chon va trien khai). Nguyen tac cot loi: giai phap xuất sac cho sai van e co the con te hon khong co giai phap. [trang 3]

- Diamond 1 - Tim ung van e. Giai oan Discover (phan kyl) su dung cac phuong phap nhu quan sat thuc te, phong van nguoi dung, khao sat, nhat ky hanh vi, cau hoi mo How Might We, ban o cac ben lien quan. Giai oan Define (hoi tul) dung so o ong cam, gom nhom (Affinity Mapping), ky thuat 5 Whys, ma tran Tac ong No luc (Impact-Effort), bieu quyet bang cham tron (Dot Voting), va phat bieu bai toan (Problem Statement). [trang 4]

- Bai hoc tu case study: Cursor, Artifact, NotebookLM. Ba case study minh hoa tam quan trong cua viec bat au tu bai toan, khong bat au tu AI. Cursor tu bo mang AI thiet ke co khi (CAD) e tap trung vao AI code editor noi oi ngu am hieu sau sac quy trinh nghiep vu (bai hoc: lech nang luc cot loi). Artifact co san pham tot nhung thi truong qua hep e thuong mai hoa (bai hoc: san pham tot = thi truong lon). NotebookLM tap trung giai quyet nhu cau hoi ap, tom tat tren tai lieu ca nhan va oi chieu nguon goc bang trich dan (bai hoc: inh vi ung iem au). Lo trinh: Bai toan Quy trinh van hanh Chi so o luong Giai phap AI. [trang 5]

- Bon lang kinh tim bai toan AI. e tim bai toan AI, hay quan sat cac hoat ong thuc te qua bon lang kinh: (1) Repetitive tac vu lap lai, dien ra thuong xuyen, can chuan hoa e tu ong hoa; (2) Time-consuming tac vu tieu ton thoi gian, khoi luong xu ly lon, hao phi o buoc tim kiem, oc hieu, cho oi, inh dang; (3) AI Advantage tac vu oi hoi phan tich ngu canh, xu ly ngon ngu tu nhien, tong hop a nguon; (4) User Pain Points nguoi dung gap kho khan, phan nan hoac bi tac nghen lien tuc. Tap trung nhan dien van e, chua voi e xuất giai phap. [trang 6]

- Anti-patterns Sai lam thuong gap. Cac sai lam thuong gap khi inh hình bai toan: (1) Solution-first uu tien giai phap, xay dung chatbot/agent truoc khi lam ro quy trinh van hanh va iem nghen; (2) No baseline khong luong hoa ton that hien tai, mat can cu anh gia hieu qua; (3) No evaluation khong thiet lap kich ban kiem thu, chi so o luong hoac phuong an oi chung; (4) No boundary khong ro pham vi tu chu cua AI va thoi iem can con nguoi phe duyet (Human-in-the-loop). Neu phat hien cac sai lam nay, can quay lai lam ro Problem Statement truoc khi chon cong nghe. [trang 7]

- PAIR Reframe at cau hoi ung. Thay vi hoi 'Can we use AI to _____?', hay hoi hai cau: 'How might we solve _____?' va 'Can AI solve this problem in a unique way?'.
